## Neater Feeder® Keeps Messy Pet's Eating Habits Contained

*Neater Pet Brand Educates Potential Retailers of the Neater Feeder's Benefits*

### Global Booth #2582

**MALVERN, PA (March 16, 2011)** – Take the mess out of mealtime, and keep the family pet's kibble and water off household floors and walls with the Neater Feeder. This Global Pet Expo, the Neater Feeder team will be educating attendees on the benefits of improving their pet's eating conditions – for a healthier, more sanitary environment and cleaner, drier floors and walls.

The super-functional feeding solution features a raised backplash that outlines the product's perimeter to protect nearby walls and household furnishings from spills and splatters that commonly occur during mealtime. Meanwhile, a dual reservoir extends from the pocketed food dishes to separate spilled food from spilled water, just like a colander would. Meaning, no more picking up soggy kibble or cleaning wet floors. And a tidier eating area can help prevent pests that are attracted your pet's messes.

To further support a healthier mealtime, the Neater Feeder is elevated on non-skid rubber treads to support better digestion. Optional leg extensions are also available for larger breeds, prone to digestion issues and joint problems. The kick-proof, spill-proof Neater Feeder is the only feeding system that serves the needs of pets *and* their home-owning parents.

Available in small, medium and large variations, the Neater Feeder is appropriately sized for dogs small and large, up to 100-plus pounds. And now the Neater Feeder is feline friendly too, thanks to the *new* cat sized Neater Feeder addition. Made in the U.S.A. from recyclable plastic, the Neater Feeder is easy to clean and is dishwasher safe. Visit the helpful Neater Feeder team at booth #2582 for more information or a demo on the handy hardware that is helping keep households across America clean.

#### **About Neater Pet Brands, LLC**
